## AW

JIS K6741 VP pipes, more commonly known as AW pipes are suitable for heavy duty usage.

The maximum working pressure is up to 10 bars and the working temperature range is from 5-45deg celsius with external pressure and 5-60deg celsius without.

This standard of pipes can be used in conjunction with pumps and mechanical plants as fluid conveyance.

AW pipes are compatible with use on JIS K6739 TS (AW) fittings.

## AE

JIS K6741 VU pipes, more commonly known as AE pipes are suitable for drainage usage.

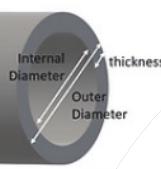

The maximum working pressure is rated as 6 bars and the working temperature range is from 5-45deg celsius with external pressure and 5-60deg celsius without.

The light pressure tolerance makes this standard of pipes more versatile. It is commonly used as rainwater down pipes, as well as for drain and vent uses like simple drainage facility and discharge of water from air-conditioning units.

Our AE pipes comes in standard lengths of 5.8m and in grey colour. For pipe diameter above 50mm, one end of the pipe is socket-ended for ease of connection to another length of pipe without the need for a socket.

AE pipes are compatible with use on JIS K6739 VU-DV (AE) fittings.

(measurements in mm)				
Nominal Diameter	Outside Diameter (OD)	AW pipe thickness	AE pipe thickness	AEO pipe thickness
13	17.8 - 18.2	-	1.8	-

800	800.00	-	20.0	-

## AEO

Catering to local demands for pipes for non-pressured applications, AEO pipes are made with thinner walls.

This standard of pipes is suitable for general drain and vent use without pressure.

AEO pipes comes in standard lengths of 5.8m and in grey colour. One end of the pipe is socket-ended for ease of connection to another length of pipe without the need for a socket.

AEO pipes are compatible with use on JIS K6739 VU-DV (AE) fittings.

# FABRICATED FITTINGS

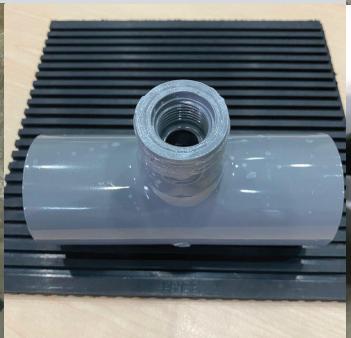

We are one of the key players in PVC fabrication and in the customizing of PVC solutions for a multitude of purposes. Given our in-depth product knowledge and technical expertise, we provide consultancy and design-and-build services to our customers.

We specialise in fabrications to achieve engineering specifications in any building and construction project. Some of our common job orders include large diameter PVC fittings reinforced to withstand heavy duty usage, puddle flanges and special fittings with reducing sizes that is not available in the standard fitting range.

We also provide PVC welding for on-site repairs. Our team of fabrication technicians are equipped with years of expertise and experience to deliver your fabrication requirements. All finished products are tested in-house and ready for installation.

Fabricated fittings comes with the option to be fibre-glass wrapped to provide extra reinforcement.

*We strive to deliver products assured of product integrity and quality finishing.*
